

Merutek® Agile II Chair

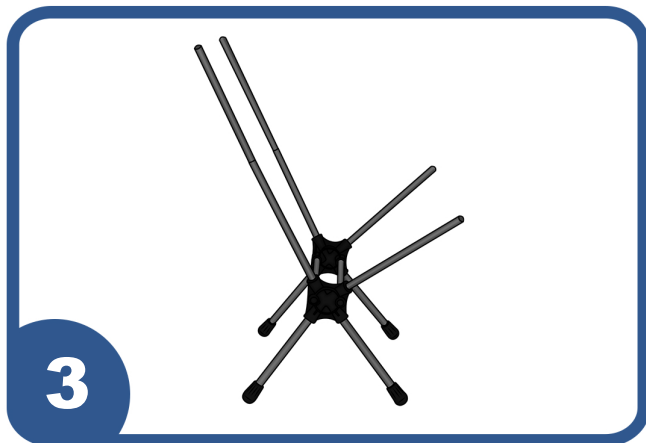

Setup / Installation

Pull chair out of carry sack

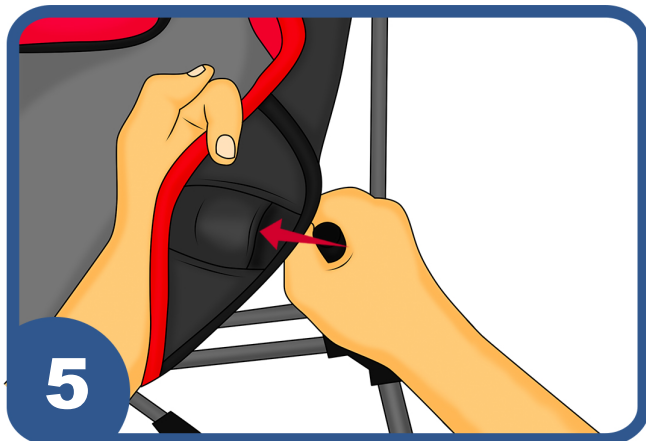

Unroll bundle and setup base structure

Connect all poles
(frame uses shock corded poles)

Place fabric on frame starting with top seat position

Place pole into pole sleeve socket,
use pressure on fabric corner

Chair is completed

For help or questions about installation, please call 866-MERUTEK (637-8835)

Merutek®

Dear Valued Customer,

Thank you for your recent purchase of the **Agile II Chair** by **Merutek**. We appreciate your business. This chair was designed for portability and packability when space is at a premium. A unique product that even fits in your carry-on!

You will find the setup of your chair to be somewhat difficult at first due to the tightness of the nylon ripstop fabric. This is actually by design, and for the safety of our customers. The chair will become easier to install over time as the fabric stretches and takes the shape of the frame. We recommend leaving the chair setup for a few days as this will help stretch the fabric and remove any wrinkles that might have occurred during the manufacturing process.

In case you didn't know, for every product sold we plant one tree! We are honored to support reforestation with **One Tree Planted** as part of our commitment to sustainability.

If there is anything you need, please do not hesitate to reach out and drop us a line.

We would love to hear from you!

Sincerely,

The Merutek Team
